

Are You Prepared?

Are you prepared in the event of an engine failure while flying over water? Do you know the best glide speed for your aircraft? Do you know the gliding distance? What type of survival equipment do you carry on board to assist in a ditching event, and when was it last inspected? The truth of the matter is that powerplants can fail! The question is are you prepared? Attend this informative safety briefing and refresh your knowledge on emergency water landings and post ditching survival. This safety briefing is held in conjunction with the Marshfield Safety Day event. Don't miss it and click on the link below to register TODAY!

Directions: See "Additional Seminar Information" for directions.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
